**Course Description:**

This introductory course focuses on understanding and working with individuals, children, youth, and adults with different disabilities and needs. Environmental, genetic and physical impairment, as well as, learning and language disabilities will be examined. An understanding of organic and functional differences will assist the student in comprehending the special needs population. Students will come to understand issues affecting clients with disabilities and create a resource base of community supports that the human services worker can utilize for information and referral.

**Learning Outcomes:**

As a result of participation in these sessions, a student can expect to:

- Critically assess how special education students are served in today's schools and how the situation can be effectively addressed. Discuss how having special needs children affects the family.
- Describe and discuss the learning process from input through process and on to the outcome.
- Compare and contrast the various categories of special needs children including those with: sensory impairments; spectrum disorders; emotional/behavioral disorders; physical impairments; intellectual impairments; learning disabilities; gifts and/or talents; speech disorders. Explain why it is important for human services workers to be familiar with information about special needs children.
- Explain the process of diagnosing and assessing special needs students. Discuss the impact of this process on the family.
- Describe evidence-based practices in inclusive elementary school program.
- Discuss transition planning as students move from school to employment or further education. Explain the role of the family in this process.
- Describe ideal challenges and situations that the human services worker may encounter when working with individuals with disabilities.
- Understand how to relate well with individuals and families experiencing challenges and celebrations, as a result of disabilities.
- Be able to identify local resources that human services workers can contact for assistance and for referrals for their clients.
- Identify issues that affect clients with disabilities and the ability of the human services worker to assist with these issues.

## Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

The Resource base should include: Name of the organization, location, contact information, target audience, services addressed by the organization, costs/yes/no. This should be a project information base that helps you to have a referral base for your use. You should create an electronic base and email it to your facilitator by 11:59 p.m. on the due date. You can then continue to add to this base once you are employed. A rubric will be provided for you once classes start.

### **Final Exam Due Date: Class 10 Weight: 30%**

Students will be required to write a final exam which will consist of multiple choice questions covering the content of classroom learning and assigned text and other readings.
